

PROJECT PHASE 7: FINAL PRESENTATION & SYSTEM DEMONSTRATION

Deadline: Week 12

Weight: 30% of the project grade

Presentation format:

- Maximum 10 minutes presentation.
- Followed by 5 minutes questions & discussion.
- All team members must be present during the final presentation.
- Every team member must present the work.

Objective

The goal of this phase is to:

- present the complete project in a professional and structured way
- demonstrate the final working application

Presentation Requirements

Students must prepare a professional presentation (PPT/PDF/Prezi/etc).

Recommended structure:

1. Introduction & Problem Definition

- project topic
- real-world motivation

2. Dataset & Data Understanding

- dataset description
- dataset size and structure

3. Data Processing & Feature Engineering

- preprocessing pipeline
- feature engineering

4. Baseline Model

- baseline approach
- training pipeline

- evaluation metrics
- initial results

5. Model Improvements & New Dataset Experiments

- improvements obtained
- application on new datasets

6. Ethical, Business & Practical Impact

- ethical concerns
- risks and limitations
- practical/business value
- SWOT analysis summary

7. Final Conclusions

- key findings
- lessons learned
- future improvements

Demo Requirements

Students must provide a live demonstration of the final system.

The demo must include:

Minimum required demo flow

1. Application startup
2. User interaction/input
3. Data processing or inference
4. Final output/result
5. Explanation of what happens internally
